

WHAT IS STUDIO39?

For over a decade, WFWA PBS39 has been a trusted regional media institution. It has earned a

reputation for high-quality broadcast production in partnership with clients who include public television in their media buying strategy. PBS39 proudly brings the same professionalism and creativity to Studio39.

Due to recent advances, Studio39 is now available to an expanded range of

clients. This extends opportunities to companies whose needs may not include public television broadcasting. Now, they too can reap the cost-effective benefits of this regional production resource. This diversified approach

benefits area businesses while Studio39 revenue is used to support PBS39's core mission.
